13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well is currently uneconomic at todays prices, even with the Royalty Reduction Plan, and current salvage prices are very low. If gas prices rise then this well may become economical. Tenison Oil would like to temporarily abandon this well but not plug it in that it may very well become economical in the near future.
