17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.) *

With reference to Memorandum of September 13, 1974 by Oil Conservation Commission of New Mexico, the subject well has been temporarily abandoned due to uneconomic operation. The well has been retained in anticipation of a secondary recovery unit in the area; however, it is believed the well will be economic now under the present price for stripper crude. The well will be placed back on production as soon as tubular goods and surface equipment can be secured. Due to the present tight situation, such equipment can probably not be secured until sometime in 1975.
