LEASE E. J. Wells WELL NO. 2 UNIT A S 12 T 25S R 36E
DATE WORK PERFORMED 6-30 thru 7-14-59 POOL Jalmat Gas

This is a Report of: (Check appropriate block) ☐ Results of Test of Casing Shut-off
☐ Beginning Drilling Operations ☒ Remedial Work
☐ Plugging ☐ Other _____

Detailed account of work done, nature and quantity of materials used and results obtained.
This well was entered on June 30, 1959, and the bottom few feet of the 5½" casing were found to be blown off as a result of a 28¼ quart nitro shot on original completion. The casing was swaged out and the open hole section from 2807 to 3030 feet was drilled and washed out with a reverse circulating unit. The well was fraced on July 13th with 15,000 gallons of Low Friction Frac carrying 22,500# of sand. Approximately 150 barrels of the 575 barrels of oil used in fracing the well were recovered during the clean up period from July 14 through the 21st. Shut in pressure 400 psi was recorded after well was shut in for 24 hours. El Paso tied the well back into their 250# gas line on July 27th. A deliverability test is to be run on the well in the next few days. Production prior to treatment was 60 MCF per day.
