Midland, Texas

Dear Sir;

Please find below copy of new memorandum on spacing of gas wells.

NEW MEXICO
Oil Conservation Commission
MEMORANDUM

" In accordance with our new rules and regulations, it has become customary for persons drilling a gas well to pool acreage to form a 160-acre drilling unit. In the future, therefore, it will be necessary for all C-101 forms for gas wells for all pools in the state to show what acreage is assigned to the proposed well. If the ownership is different or the type of land within the pooled unit is different - i.e., state, federal or fee - a plat must accompany the C-101 form showing the various ownerships and types of land.

It is also important to note that no gas well can expect a full allowance unless at least 168 acres are assigned to it, if said well had been drilled since January 1, 1950, or from that time on."

STATE OF NEW MEXICO
OIL CONSERVATION COMMISSION
Signed: R. R. Spurrier
Secretary-Director

September 29, 1950

There can not be a gas well drilled closer than 660' from 40 acre unit line.

Very truly yours,

OIL CONSERVATION COMMISSION

and it is in accordance with our new rules and regulations, it has become necessary for there to be drilling as well to pool acreage to form a 160-acre drilling unit. In the future, therefore, it will be necessary for all 5-101 forms for acreage to show what acreage is well as all pools in the state to show what acreage is assigned to the proposed well. If the ownership is different or the type of land within the pooled unit is different, state, federal or fee - a plat must accompany the 5-101 form showing the various ownerships and types of land.
