OIL CONSERVATION COMMISSION,
Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intention to do certain work as described below at the Humble Oil & Refining Co.Wm. A. Lindley "A"Well No. 2 in SW 1/4 of SW 1/4

Company or Operator

Lease

of Sec. 13, T. 25S, R. 36E, N. M. P. M., Jal Field,Lea

County.

FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

Due to the above described well having passed its economic production limit on gas lift and due to the inability of doing remedial work as a result of injured or corroded 5-1/2" and 7" casing, request is hereby made for permission to plug and abandon. Subject to the approval of the Oil Conservation Commission, a plug (Cement) will be set in the bottom of the hole and extending up 100' to 150' into the 5-1/2" Casing, which is set at 3368'. By progressively shooting and pulling as much 5-1/2" casing as possible will then be recovered. The hole will then be cemented up into the 7" casing and to the base of the salt. The 7" casing is set at 2891'. The 7" casing above the cement plug will then be progressively shot and pulled to obtain as much 7" casing as possible. The hole will then be filled to near the surface with heavy mud and a cement cap placed on the top of the 10-3/4" surface casing. The 10-3/4" Casing is set and cemented at 493'. No attempt will be made to recover the 10-3/4" casing. In conformity with rules of the Oil Conservation Commission, a suitable marker will be erected at the well site.

Approved _____, 19____
