E. F. Sholess A-13 No. 3

Hobbs, New Mexico November 22, 1950

Well No. 3 is located 660 ft. from N line and 660 ft. from E line of sec. 13SE 1/4 Sec. 13 25 S 36 E N 27 W
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)Cooper Lin New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is our intention to drill a well with rotary tools at the above location to a total depth of approximately 3100'. All casing points will be cemented in accordance with approved methods of the U.S. Geological Survey and any other special requirements will be complied with.

It is planned to use the following casing pattern: 7 5/8" casing to be set at approximately 1100' and cemented with 550 sacks. Cement to be circulated to surface. 5 1/2" casing to be set at approximately 3100' and cemented with approximately 825 sacks or sufficient cement to protect the salt section as determined by caliper survey. 5 1/2" casing to be perforated opposite the pay zone.

Approval to produce this well upon completion is also requested.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
