Lubbock, Texas

Re: Brown Gas Well No. 1 - Unit F
Section 25-T25South, R36East
Jalmat Gas Pool

Gentlemen:

The Commission requests three copies of the Multi-point Back Pressure test (graph attached) mentioned on Form C-103 for subject well. Further, it is requested that a Deliverability Test be taken whenever this well is connected to a gas line and the results filed with this office within forty-five days of connection.

Failure to comply with the above requests subjects this well to cancellation of allowable.

Please notify the purchaser of the request for a Deliverability Test.

Yours very truly,

OIL CONSERVATION COMMISSION

Joe D. Ramey
Proration Manager
