Mr. Joe D. Ramey
Supervisor & Proration Manager
Oil Conservation Commission District I
P. O. Box 2045
Hobbs, New Mexico

Dear Mr. Ramey:

As suggested during our conversation yesterday,
I am enclosing the original and four copies of Form C-103
outlining the plugging back of Ralph Lowe's Sholes
"B" 2 to a gas sand in the Yates formation. Perhaps
this report will remove the well from the oil proration
schedule.

Also I am including two copies of a letter to the
Santa Fe Office requesting a non-standard 160-acre gas
proration unit be assigned this well. The other forms
will be submitted as soon as possible following the
acreage assignment.

Yours truly,

Archie P. Farr
Petroleum Engineer
