DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The Sholes B-25 No. 5 was completed on July 17, 1957, for an IP flowing of 142 BOPD. Since that time, bottom hole pressure has steadily declined to a point that sustained flow has become difficult and swabbing is necessary in order to maintain production.

We therefore propose to install a pumping unit on this well in order to maintain production.

ILLEGIBLE

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
