The present producing section, 3444'-3591' is deemed not commercial.

We desire to plug this well back to 3425' in the 5 1/2" casing with a cement plug.
Section 3162'-3205' is to be jet perforated, 4 shots per foot.
We propose using a hydrafrac treatment of approximately 3000 gals. in an attempt at making a Yates oil producer.
