

**DUPLICATE**

NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

## MISCELLANEOUS REPORTS ON WELL

**RECEIVED**  
SEP 24 1946  
**RECEIVED**

Submit this report in triplicate to the Oil Conservation Commission or its proper agent with the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-offs, result of plugging well and other important operations, even though the work was witnessed by an agent of the commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL	<b>X</b>	REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF		REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL

1. The first step in the process is to identify the problem. This is done by gathering information about the situation and the people involved. The next step is to analyze the problem and determine the causes. This is done by looking at the data and the relationships between the different elements. The third step is to develop a plan of action. This is done by deciding on the best way to solve the problem and the resources needed. The fourth step is to implement the plan. This is done by putting the plan into action and monitoring the progress. The fifth step is to evaluate the results. This is done by comparing the actual results with the expected results and determining the reasons for any differences.

2. The second step in the process is to identify the problem. This is done by gathering information about the situation and the people involved. The next step is to analyze the problem and determine the causes. This is done by looking at the data and the relationships between the different elements. The third step is to develop a plan of action. This is done by deciding on the best way to solve the problem and the resources needed. The fourth step is to implement the plan. This is done by putting the plan into action and monitoring the progress. The fifth step is to evaluate the results. This is done by comparing the actual results with the expected results and determining the reasons for any differences.

3. The third step in the process is to identify the problem. This is done by gathering information about the situation and the people involved. The next step is to analyze the problem and determine the causes. This is done by looking at the data and the relationships between the different elements.
