

DUPLICATE

OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

RECEIVED
JUL 10 1946
RECEIVED

HOBBBS OFFICE

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL	X	REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF		REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL

Title

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that proper record-keeping is essential for transparency and accountability, particularly in financial matters. The text suggests that organizations should implement robust systems to track every aspect of their operations, from procurement to sales, to ensure that all data is captured and stored securely.

2. The second section focuses on the role of technology in modern record management. It highlights how digital tools and software solutions can significantly enhance the efficiency and accuracy of record-keeping processes. By leveraging cloud storage and automated data entry systems, organizations can reduce the risk of human error and ensure that their records are always up-to-date and accessible. The text also mentions the importance of regular backups and security measures to protect sensitive information from loss or unauthorized access.

3. The third part of the document addresses the challenges associated with managing large volumes of data. It acknowledges that as organizations grow, the amount of information they generate increases exponentially, making it difficult to manage manually. To overcome this, the text recommends adopting a structured approach to data organization, such as categorizing records by date, department, or project. It also suggests implementing access controls to ensure that only authorized personnel can view or modify the data, thereby maintaining its integrity and confidentiality.

4. The final section discusses the importance of training and education in effective record management. It states that even the most advanced systems and tools are only as good as the people using them. Therefore, organizations should invest in training programs to ensure that all employees understand the correct procedures for handling records. This includes teaching them how to use the software, the importance of data accuracy, and the consequences of poor record-keeping practices. Regular training sessions and updates are essential to keep the workforce informed of the latest best practices and technological advancements in the field.
