17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Reserve Oil, Inc. proposes to downhole commingle the Jalmat & Langlie Mattix zones in subject wellbore, authorized by New Mexico Oil Conservation Commission Order #R-5590 (copy attached).

Subject well is producing from the Langlie Mattix zone and is presently isolated from an old Jalmat completion by a Baker Model "A-1" tension packer at 3249'. To accomplish downhole commingling, only the packer will have to be removed.

18. I hereby certify that the foregoing is true and correct
