The New Mexico Oil Conservation Commission is reclassifying all gas wells in the Langlie-Mattix Oil Pool with gas-oil ratios in excess 100,000/1 as gas wells in the Jalmat Pool.

To be classified as a Jalmat well, however, it is necessary that it be completed in the vertical limits of that pool. Thomas No. 2 was completed at a total depth of 3680'. It is proposed to plug the well back to 3483' and complete as a gas well which will fall within the limits of the Jalmat Pool.
