Re: Application of Cities Service Oil Company
for approval of a non-standard gas proration
unit embracing the NE/4, Sec. 19-24S-37E,
Jalmat Gas Pool, Lea County, New Mexico

Gentlemen:

Comes now Cities Service Oil Company and respectfully requests the Oil Conservation Commission to approve a non-standard gas proration unit of 160 acres, embracing the NE/4, Section 19-24S-37E, Jalmat Gas Pool, Lea County, New Mexico, and in support of the application wishes to state the following:

1. The Cities Service Oil Company is the owner of the Thomas Lease covering the E/2, Section 19-24S-37E.
2. The Thomas No. 2 is located 2310' from North Line, 2210' from East Line, Section 19-24S-37E, and is now classified as a Langlie-Lattix oil well. It produces through open hole from 2870-3680', which includes the Yates, Seven Rivers and Queen formations. Drill stem tests during completion indicated that the Queen formation was non-productive.
3. This well meets the spacing requirements of Rule R-520 for classification as a Jalmat gas well with a non-standard gas proration unit of 160 acres.
4. All operators in Section 19 have been notified of this application and provided waivers to send to the Conservation Commission should they have no objection.
5. A plat is attached showing the above described lands.

Respectfully submitted,

CITIES SERVICE OIL COMPANY

JDA/lbc
Attach.
