17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

The Langlie Mattix gas zone in this well (perfs 3425-3465') is depleted and has not produced in several years. No remedial possibilities exist. We propose to plug & abandon this zone by setting a 7" 24# CIBP at approximately 3375' and capping BP w/35' of cement. The Jalmat gas zone will then be produced through 2-7/8" tubing w/packer set at 2800'.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
