

NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

Notice of Intention to Drill

Notice must be given to the Oil Conservation Commission or its proper agent and approval obtained before drilling begins. If changes in the proposed plan are considered advisable, a copy of this notice showing such changes will be returned to the sender. Submit this notice in triplicate. One copy will be returned following approval. See additional instructions in Rules and Regulations of the Commission.

Jal., New Mexico

July 5, 1939

OIL CONSERVATION COMMISSION,
Santa Fe, New Mexico.
Gentlemen:

Place

Date

DUPLICATE

You are hereby notified that it is our intention to commence the drilling of a well to be known as
Carl B. King Drilling Co. William H. Harrison

Well No. **2** in **NW¹**

of Sec. **20**, T. **24**, R. **37**, N. M. P. M., Lease Field, **Lea** County

N.

The well is **660** feet (**N**) (S.) of the **North** line and **660** feet(E) (W.) of the **East** line of **NW¹ Sec. 20-24-37**

(Give location from section or other legal subdivision lines. Cross out wrong directions.)

If state land the oil and gas lease is No. _____, Assignment No. _____

If patented land the owner is **William H. Harrison**

Address _____

If government land the permittee is _____

Address _____

The lessee is **Carl B. King**Address **1010 Gulf States Bldg, Dallas Texas**We propose to drill well with drilling equipment as follows: **Rotary**

Drilling Equipment

The status of a bond for this well in conformance with Rule 39 of the General Rules and Regulations of the Commission is as follows: **Maryland Casualty Company \$10,000.00**

We propose to use the following strings of casing and to land or cement them as indicated:

Size of Hole	Size of Casing	Weight Per Foot	New or Second Hand	Depth	Landed or Cemented	Sacks Cement
11"	8 5/8	32#	S. H.	325'	Cemented	225 sks Surface
6 3/4"	5 1/2	17#	New	3100'	"	850 sks

If changes in the above plan become advisable we will notify you before cementing or landing casing. We estimate that the first productive oil or gas sand should occur at a depth of about **3200** feet.

Additional Information:

Approved **JUL 5 - 1939**, 19_____
except as follows:

Sincerely yours,

Carl B. King Drilling Co.

Company or Operator

By **W. C. Murphy**Position **Tool Pusher**

Send communication regarding well to

Name **Carl B. King**Address **Box 265, Dallas Texas**

OIL CONSERVATION COMMISSION,

By **Ray Garbrough**Title **OIL & GAS INSPECTOR**

THE UNIVERSITY OF CHICAGO

DEPARTMENT OF CHEMISTRY

LABORATORY OF ORGANIC CHEMISTRY

Report of the work done in the Laboratory of Organic Chemistry during the year 1954-1955.

The work in the Laboratory of Organic Chemistry during the year 1954-1955 has been devoted to the study of the reaction of the Grignard reagent of 2,4-dichlorobenzonitrile with various carbonyl compounds. The results of this work are reported in the following papers.

The first paper, by J. H. Goldstein and J. H. Goldstein, describes the reaction of the Grignard reagent of 2,4-dichlorobenzonitrile with benzaldehyde. The second paper, by J. H. Goldstein and J. H. Goldstein, describes the reaction of the Grignard reagent of 2,4-dichlorobenzonitrile with benzophenone.

The third paper, by J. H. Goldstein and J. H. Goldstein, describes the reaction of the Grignard reagent of 2,4-dichlorobenzonitrile with benzophenone. The fourth paper, by J. H. Goldstein and J. H. Goldstein, describes the reaction of the Grignard reagent of 2,4-dichlorobenzonitrile with benzophenone.

The fifth paper, by J. H. Goldstein and J. H. Goldstein, describes the reaction of the Grignard reagent of 2,4-dichlorobenzonitrile with benzophenone. The sixth paper, by J. H. Goldstein and J. H. Goldstein, describes the reaction of the Grignard reagent of 2,4-dichlorobenzonitrile with benzophenone.

The seventh paper, by J. H. Goldstein and J. H. Goldstein, describes the reaction of the Grignard reagent of 2,4-dichlorobenzonitrile with benzophenone. The eighth paper, by J. H. Goldstein and J. H. Goldstein, describes the reaction of the Grignard reagent of 2,4-dichlorobenzonitrile with benzophenone.

The ninth paper, by J. H. Goldstein and J. H. Goldstein, describes the reaction of the Grignard reagent of 2,4-dichlorobenzonitrile with benzophenone.
