According to our records the Langlie Mattix zone in the J.F. Black #4 was abandoned in 1990 with a plug back TD of 3260. The Jalmat Yates zones was perforated 2803-3058 at that time. A well completion report, Form C-105 was filed but no request for gas allowable was ever submitted for the Jalmat zone.

If you return this well to production you must submit a C-104 for allowable assignment to the Jalmat, or show that the Jalmat perfs have been squeezed and the Langlie Mattix zone opened.
