The twelve inch casing will be cemented to the survace and the 8 5/8" will be cemented up into the 12¹/₂" casing. In the event that water is not encountered at 500 feet, 12¹/₄" casing will not be run and 10³/₄ csg. Approved will be cemented below the first water iound under the 15²/₅csg.

However if the hole remains dry to the top of the salt only the 8 5/8" csg. will be run, in which case 8 5/8" will be cemented to the surface.
