Production from the Silurian has declined below the economic limit. It is proposed to recomplete by abandoning the Silurian Zone and recompleting in the Blinbury (oil) zone.

A Bridge Plug will be set above the current Silurian perforations and capped with 20' of cement. Casing to be tested and repaired as necessary. Blinbury to be perforated at various intervals between 5448' - 5718', stimulated as necessary.

IN ABOVE SPACE DESCRIBE PROPOSED PROGRAM: If proposal is to deepen or plug back, give data on present productive zone and proposed new productive zone. If proposal is to drill or deepen directionally, give pertinent data on subsurface locations and measured and true vertical depths. Give blowout preventer program, if any.
