The elevation of the derrick floor above sea level is 3200 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

T. D. - 3475' Line

Anticipate shooting this well with approximately 340 quarts of nitroglycerine from 3298-3475. Shot will be tamped with gravel.

Present production from this well is approximately one barrel per day swabbing.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
