

## NE MI CO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

## MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

SECRET

Figure 1. The effect of the concentration of the *Salmonella* suspension on the detection of *Salmonella* in the fecal sample. The detection of *Salmonella* was performed by the PCR method. The results were expressed as the percentage of positive samples. The data were analyzed by the chi-square test. The results are shown as the mean  $\pm$  SD. The significance level was  $p < 0.05$ .

...the same conditions were used again as "S" before and the same data
