NEW M OIL CONSERVATION COMM

Ţ

Santa Fe, New Mexico

## MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

well had cleaned itself the flow was diverted into the storage tanks, and the amount of production during the first 24 hours was 425 barrels of oil, 0.5 percent B.S., and no water. The results of the production test through tubing, together with other pertinent data, is not available at the present date, but will be forwarded in a few days.
