

NEW MEXICO OIL CONSERVATION COMMISSION

Santa, Fe, New Mexico

MISCELLANEOUS NOTICES

Submit this notice in triplicate to the Oil Conservation Commission or its proper agent before the work specified is to begin. A copy will be returned to the sender on which will be given the approval, with any modifications considered advisable, or the rejection by the Commission or agent, of the plan submitted. The plan as approved should be followed, and work should not begin until approval is obtained. See additional instructions in the Rules and Regulations of the Commission.

Place

Date

OIL CONSERVATION COMMISSION,
Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intention to do certain work as described below at the

Repollo Oil Company R. L. Mosley Well No. 4 in S/2S/2
Company or Operator Lease

of Sec. 34, T. 24S, R. 37E, N. M. P. M., Langlie Field,

Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

Set 3141' of 7"OD Casing at a depth of 3147' on Mar. 30th and cemented
W/ 200 Sacks

DUPLICATE

Approved APR 7 - 1938, 19
except as follows:

Repollo Oil Company
Company or Operator

By L. Surratt

Position Dist. Supt.
Send communications regarding well to

Name L. Surratt

Address Hobbs, N.M.

OIL CONSERVATION COMMISSION,

By Guy Shepard
Title Oil & Gas Inspector

PROTON SUBSTITUTION

The proton substitution reaction is a type of reaction in which a proton is replaced by another atom or group of atoms. This reaction is often used in the synthesis of organic compounds. The reaction is typically carried out in the presence of a catalyst, such as a metal complex, and a base. The reaction is often used to synthesize compounds that are difficult to synthesize by other means. The reaction is often used to synthesize compounds that are difficult to synthesize by other means. The reaction is often used to synthesize compounds that are difficult to synthesize by other means.

The reaction is often used to synthesize compounds that are difficult to synthesize by other means. The reaction is often used to synthesize compounds that are difficult to synthesize by other means. The reaction is often used to synthesize compounds that are difficult to synthesize by other means. The reaction is often used to synthesize compounds that are difficult to synthesize by other means. The reaction is often used to synthesize compounds that are difficult to synthesize by other means.

The reaction is often used to synthesize compounds that are difficult to synthesize by other means. The reaction is often used to synthesize compounds that are difficult to synthesize by other means. The reaction is often used to synthesize compounds that are difficult to synthesize by other means. The reaction is often used to synthesize compounds that are difficult to synthesize by other means. The reaction is often used to synthesize compounds that are difficult to synthesize by other means.

The reaction is often used to synthesize compounds that are difficult to synthesize by other means. The reaction is often used to synthesize compounds that are difficult to synthesize by other means. The reaction is often used to synthesize compounds that are difficult to synthesize by other means. The reaction is often used to synthesize compounds that are difficult to synthesize by other means. The reaction is often used to synthesize compounds that are difficult to synthesize by other means.

The reaction is often used to synthesize compounds that are difficult to synthesize by other means. The reaction is often used to synthesize compounds that are difficult to synthesize by other means. The reaction is often used to synthesize compounds that are difficult to synthesize by other means. The reaction is often used to synthesize compounds that are difficult to synthesize by other means.
