17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

\*Jalmat Zone (UT) in this well is known as Wm. H. Harrison "D" WN Com #1.

The Langlie Mattix (LT) zone in this well (perfs 3360-3400 & 3462-3492) last produced in May, 1969 when it became uneconomical. No remedial possibilities exist. We propose to P & A by capping 415-D packer and plug at 3340' w/20 ft of sand and capping this w/35 ft. of cement. We also propose to add perforations to the Jalmat zone w/one 3/8" JS each at 3061, 65, 73, 82, 91, 3112, 22, 26, 29, 33, 38, 44, 50 & 3185' (14 holes - Isotron log). Treat these perfs w/2000 gallons of 15% HCl acid and if necessary for rate, frac w/10,000 gallons of water containing 15,000# of 20/40 sand. Well to be single completion through 2-7/8" tubing landed at about 3100'.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
