

## NEV. EXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

## MISCELLANEOUS NOTICES

Submit this notice in triplicate to the Oil Conservation Commission or its proper agent before the work specified is to begin. A copy will be returned to the sender on which will be given the approval, with any modifications considered advisable, or the rejection by the Commission or its agent, of the plan submitted. The plan as approved should be followed, and work should not begin until approval is obtained. See additional instructions in the Rules and Regulations of the Commission.

NOTICE OF INTENTION TO DEEPEN WELL		" # to change Casing program ###	

Hobbs, New Mexico April 8th 1937

Place

OIL CONSERVATION COMMISSION,

Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intention to do certain work as described below at the

Gulf Oil Corpn - Gypsy Divn. C. D. Woolworth Well No. #1 in SE/4  
 of Sec. 30, T. 24, R. 37, N. M. P. M., Jal Field,  
 Lea County.

## FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

Originally we planned to set 300' of 10 3/4" surface casing, 1300' of 7 5/8" intermediate string on top of salt and approximately 3300' of 5 1/2" production casing string.

At the present time we feel that the possibility of oil is questionable, therefore we propose to complete the well as follows:

Set 10 3/4" casing at 300' or 15' in the Red Bed and cement with 225 sacks.

Set 7 5/8" intermediate casing string through the Brown Lime or at approximately 2900' this string will be cemented with 600 sacks of cement and 12 sacks of aquagel or 150% of the calculated amount to bring the cement to the surface. In the event that production of oil is encountered below the big gas section we will run a string of 5 1/2" production casing. The 7 5/8" casing string will separate the brown lime gas from the big gas.

Approved APR 9, 1937  
 except as follows:
