REPORT OF THE COMMITTEE ON THE  
PROGRESS OF THE PHYSICAL SCIENCES

The Committee on the Progress of the Physical Sciences was organized in 1946 to study the progress of the physical sciences in the United States and to make recommendations to the National Science Foundation. The Committee has held several public hearings and has received many suggestions from scientists and the public. The Committee has also conducted extensive research into the organization and administration of the physical sciences in the United States. The Committee's report is based on the results of its research and its public hearings. The Committee believes that the physical sciences in the United States are in a state of rapid growth and that the National Science Foundation should continue to support the physical sciences in the United States. The Committee also believes that the physical sciences in the United States should be organized and administered in a way that will promote the most efficient use of the resources of the National Science Foundation.
