(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Midland, Texas, April 27, 1949

Well No. 1, NCT-3 is located 1980 ft. from N line and 660 ft. from W line of sec. 30  
SW 1/4 of Sec. 30 24-S 37-E NMPM  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
Langlie-Mattix Lea New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3267 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Please refer to our Form 9-331a dated Fort Worth, Texas, April 14, 1949 covering Notice of Intention to Drill subject well.

We desire to change the 7" casing program as follows:

Set 7" 20# casing @ 2825' and cement with 450 sacks.

This change is necessary because of the unexpected air encountered at approximately 1600'. This air is of sufficient volume and pressure to unload the drilling fluid from the hole making it hazardous to drill into the pay section without casing off this air.

Drilling will be continued to proposed Total Depth of 3355' and will be produced open hole unless water is encountered in which case a supplementary notice will be filed to exclude same.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
