FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

On our "Notice Of Intention to Drill" this well, filed with you on July 25, 1939, we reported that this well would be drilled with cable tools. This has been changed and is now our intention to drill the well with rotary from top to total depth. This brings about some change in the casing program, the following being the strings we intend to use:

- 9-5/8" OD 36# New Casing, set at approximately 1200' and cemented with 400 sx cement - Halliburton Process. The cement will be circulated back into the bottom of the cellar.
- 7" OD 22# New Casing, set at approximately 3415' with approximately 200 sx cement - Halliburton Process.

The drilling contractor for this well is
Morter Drilling Company, Ardmore, Oklahoma.
