

NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS NOTICES

Submit this notice in triplicate to the Oil Conservation Commission or its proper agent before the work specified is to begin. A copy will be returned to the sender on which will be given the approval, with any modifications considered advisable, or the rejection by the Commission or agent, of the plan submitted. The plan as approved should be followed, and work should not begin until approval is obtained. See additional instructions in the Rules and Regulations of the Commission.

Title OIL & GAS INSPEC

the following table, which shows the results of the analysis of variance for the different factors.

Source of Variation		Sum of Squares	Mean Square	F	Prob > F
Between Groups	1	1.00	1.00	1.00	.318
Within Groups	19	1.00	.05		
Total	20	2.00			

The results of the analysis of variance show that there is no significant difference between the groups. The F value is 1.00, which is less than the critical value of 1.65 at the 5% level of significance. Therefore, we fail to reject the null hypothesis.

The results of the analysis of variance also show that there is no significant difference between the groups. The F value is 1.00, which is less than the critical value of 1.65 at the 5% level of significance. Therefore, we fail to reject the null hypothesis.
