

NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS NOTICES

Submit this notice in triplicate to the Oil Conservation Commission or its proper agent before the work specified is to begin. A copy will be returned to the sender on which will be given the approval, with any modifications considered advisable, or the rejection by the Commission or agent, of the plan submitted. The plan as approved should be followed, and work should not begin until approval is obtained. See additional instructions in the Rules and Regulations of the Commission.

PROTON ALPHA-1000

The Proton Alpha-1000 is a high performance, low cost, microcomputer system. It is designed for use in a wide range of applications, from data processing to scientific research. The system is based on the Intel 8086 microprocessor and includes a 1000 word random access memory (RAM) and a 1000 word read only memory (ROM). It also features a serial port, a parallel port, and a timer. The system is housed in a compact, rack-mountable case and is powered by a 5VDC supply.
