Re: Application to Dually Complete  
Sinclair R. L. Mosley No. 1 in  
the Jalmat Gas Pool, Lea County,  
New Mexico.

Gentlemen:

Sinclair Oil & Gas Company wishes to make this application for an order authorizing the dual completion of the subject well and the formation of a Non-standard Proration Unit consisting of the following described acreage to be assigned to said well.

In this connection Sinclair wishes to state:

1. Sinclair Oil & Gas Company is the Operator of the R. L. Mosley No. 1 well located in the SW/4 SE/4 of Section 34, T-24-S, R-37-E, which was completed April 5, 1937, at a total depth of 3490 ft. Seven inch casing was set at 3265 ft. and cemented with 150 sacks and opened in the Queen oil zone from 3265 ft. to 3490 ft.
2. The unit on which this well is located consists of contiguous quarter quarter sections and is described as follows: S/2 of S/2 of Section 34, T-24-S, R-37-E. The well is located 330 ft. from north and 2310 ft. from east lines of this unit and therefore qualifies for the assignment of 160 acres under Order R-520. The length or width of said unit does not exceed 5280 ft. and it lies wholly within a single governmental section. The royalty interests and the leasehold interests are common under this unit. Subject unit may reasonably be presumed to be productive of gas.
3. Sinclair proposes to dually complete subject well in the following manner.
  - a. Perforate the 7 inch casing from 2570 ft. to 3165 ft. in the Jalmat Gas Pool.
