17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

We propose to shut well in as follows:

- Capacity of well is less than one bbl of oil per day, which is uneconomical to produce.
- It is recommended that this pool be shut in, and held in that manner until further work on the other existing zones require a workover. (The other producing zones, Justis-Tubb-Drinkard, and Justis (Blinbry)).
- We plan to shut subject well in as uneconomical to produce, until there is no possible chance the casing string will be needed in the future. This proposal subject to approval of the United States Department of the Interior Geological Survey.

18. I hereby certify that the foregoing is true and correct
