Undesignated (McKee)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

To increase production we propose to do the following work.

1. Acidize Ellenburger section from 8458' to 8462' with 1500 gallons of regular 15% ISTNE HCL Acid.
2. Swap well, test, return well to production.

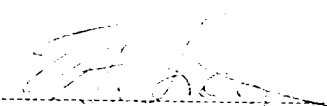

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
