Re: G.L. Erwin B Fed NCT-2 Well #2-J
Section 35, T24S, R37E

Gentlemen:

DHC-709 has been issued to approve the downhole commingle of the Justis Blinbry and North Justis Devonian zones in the above-referenced well. In order to complete this procedure please file a downhole commingled C-116 for these zones and a copy of the federal sundry notice indicating the zones have now been downhole commingled as authorized by DHC-709.

Also, it is the operator's responsibility to advise the transporter of this downhole commingle authority.

It is noted that this well is still a dual completion -- Blinbry/Devonian and Justis Glorieta Gas and an annual packer leakage test should be filed.

Very truly yours,

OIL CONSERVATION DIVISION

Jerry Sexton
Supervisor, District I
