Mr. I. R. Trujillo  
New Mexico Oil Conservation Commission  
P. O. Box 2088  
Santa Fe, New Mexico

Dear Mr. Trujillo:

TEXACO Inc. has erroneously reported gas production on its C. C. Fristoe "a" (NCT-1) Lease. The production which has been reported on New Mexico Oil Conservation Form C-115 from February, 1964 through April, 1965 as coming from Well No. 6 in the Jalmat Field has actually come from Well No. 1 in the Langlie Mattix Field. This production is metered and sold to El Paso Natural Gas Company through Meter 6312301. Please advise us as to whether or not corrected Form C-115 will be required or whether you can make the necessary corrections in your records on the basis of this letter.

This error appears to have occurred due to the fact that prior to November, 1963 both Well No. 6 and Well No. 1 were completed in the Langlie Mattix Field. At this time Well No. 6 was re-worked in the Jalmat Field as a shut in gas producer. Well No. 6 is still shut in at this time while Well No. 1 is continuing to produce from the Langlie Mattix.

We will appreciate your help in advising us as to any further steps which may be necessary to adequately correct this error.

Yours very truly,

*W. B. Hubbard*  
W. B. Hubbard  
District Superintendent
