The elevation of the derrick floor above sea level is **3195** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

T. D. 3518' - Lime.

The above well was shot 1-18-40 with 400 quarts nitro-glycerine from 3410'-3518'. The shot was tamped with 40' of gravel and the hole loaded with oil.

Prior to shooting the well produced 44 barrels pipe line oil in 24 hours swabbing. After shooting and cleaning out to bottom, 2" tubing was run to bottom with a Guiberson Spiral Packer set in the 7" casing at 3360', and the well flowed 110 barrels pipe line oil through 3/4" choke, 24 hours, with gas oil ratio 2809'.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
