This form is <u>not</u> to be used for **reporting** packer leakage tests in Northwest New Mexico

NEW MEXICO OIL CONSERVATION COMMISS"

SOUTHEAST NEW MEXICO PACKER LEAKAGE TEST

Operator Cities Service Oil Company	Leas	e Hodges ''B''		ell
Location Unit Sec of Well L I	Twp 255	Rge 37E	County	<u>o. 3</u> Lea
Name of Reservoir or Pool Upper	Type of Prod (Oil or Gas)	Method of Prod Flow, Art Lift	Prod. Medium (Tbg or Csg)	Choke Size
Compl Slinebry Lower	011	Flow	Tubing	18/64
Compl Fusselman	011	Kobe	Tubing	Open
	FLOW TEST	NO. 1		
Both zones shut-in at (hour, date):_	3:45 AM 3-	1-71		
Well opened at (hour, date):	8:15 AN 3-	2-71	Upper Completion	Lowe r Completion
Indicate by (X) the zone producing	•••••	•••••	<u>x</u>	
Pressure at beginning of test	••••••	•••••	450	-0-
Stabilized? (Yes or No)	••••••	••••••••	····· Yes	Yes
Maximum pressure during test	•••••	• • • • • • • • • • • • • • • • • • • •	450	-0-
Minimum pressure during test	45	-0-		
Pressure at conclusion of test				
Pressure change during test (Maximum minus Minimum)				
Mas pressure change an increase or a	de cr ease?	•••••	•••••	-0-
Vell closed at (hour, date): 7:30 Dil Production		Total Tim Production	-	
During Test: 18 bbls; Grav. 30	Gas Prod	uction est 130	MCF; GOR 7	222

FLOW TEST NO. 2			
Well opened at (hour, date): 9:00 AM 3-4-71		Upper Completion	Lowe r Completion
Indicate by (X) the zone producing	u • 4 • • • • • • • • • • • •		x
Pressure at beginning of test			-0-
Stabilized? (Yes or No)			Yes
Maximum pressure during test			-()-
Minimum pressure during test		430	-0-
Pressure at conclusion of test		450	-0-
Pressure change during test (Maximum minus Minimum)		20	-0-
Was pressure change an increase or a decrease?	· · · · · · · · · · · · · · · · · · ·	X	-0-
Well closed at (hour, date) 8:30 AM 3-5-71 Total time on Oil Production Production			
Gas Production During Test:bbls; Grav;During Test	-0- MCF;	GOR	-0-
Remarks No look indicated			

No leak indicated

SULTERAST NEW MEXICO PACKER LENEAS ST INSTERTIONS

1 - plevel (Bakage test shall be bommenhed in each multiply one of 1 well within some days ifter actual completion of the well, the drobe 'y the base as prescribed by the order authorizing the multiple confection. So there as prescribed by the order authorizing the multiple confection. dept to instant the amenned on all with during which is so that when ever remedial work has been done on a well during which is so that when ever remedial work has been done on a well during which is so the is the tubing have been disturbed. Tests shall also be taken at any inclusive commentiation is suspected or when requested by the Commission.

2 it least 72 hours oright to the commencement of any prokenomics easing test. The operation shall notify the commission is writing of the end to the the test is to be commenced. Offset operators shall also be notice three.

3. The packer leakage test shall commence when both zon-s of the duction are shullin for pressure stabilization. Both tones shall emain shutter with the well head pressure in each has stabilized on their with the stabilized pressure in each has stabilized on the form minimate of two heavs thread ther, provided however, that they need not head the shutter that they need not head the shutter that they need not head the shutter.

5. For Flow Test No. 1. One zone of the dual completion shall be pressured at he normal rate of production while the other zone relates shull be two shall be continued until the flowing wellhead pressure as before starilized and for a minimum of two hours thereafter, presided howeve, that the flow test need not continue for more than 24 hours. 5 Following comp for of Flow Test No. 1, the well shall again be shutin, a accordance Paragraph 3 above.

6. Flow Test No. 2 shall be conducted even though no leak was indicated during Flow Test No. 1. Procedure for Flow Test No. 2 is to be the same as for Flow Test No. 1 except that the previously produced zone shall remain shut-in while the previously shut-in zone is produced.

7. All pressures, throughout the entire test, shall be continuously measured and recorded with recording pressure gauges, the accuracy of which must be checked with a deadweight tester at least twice, once at the beginning and once at the end, of each flow test.

beginning and once at the end, of each flow test. 8. The results of the above-described tests shall be filed in triplicate within 15 days after completion of the test. Tests shall be filed with the appropriate District Office of the New Mexico Off Conservation Commission on Southeast New Mexico Packer leakage Test Form Revised 11-..58, tog ther with the original pressure recording gauge charts with all the desimily pressures which were taken indicated thereon. In liet of fil og the aforesaid charts, the operator may construct a pressure versus tim surve for each zone of each test, indicating thereon all pressure changes which may be reflected by the gauge charts as well as all deadweight pressure readings which were taken. If the pressure curve is submitted, the original chart must be permanently filed in the operator's office. Form C-116 shall also accompany the Packer Leakage Test Form when the test period coincides with a gas-oil ratio test period.
