17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.) *

Westates Federal No. 6 is dually completed in the McKee (7900'-7988') and Ellenburger (8380'-8460') pay zones. The McKee pay was temporarily abandoned in 1966 and the Ellenburger was temporarily abandoned in 1968 since both zones had reached their economic limit. The Waddell was also perforated (8060'-8096') and tested but was non-productive. It is proposed that the above zones be abandoned as follows:

1. Abandon the Ellenburger (8380'-8460') by setting a CI Bridge Plug at 8350'.
2. Abandon the Waddell (8060'-8096') by setting a CI Bridge Plug at 8030'.
3. Abandon the McKee (7900'-7988') by setting a CI Bridge Plug at 7870'.
4. The 7" casing will remain in the well, and the well status will be temporarily abandoned while evaluating upper zones for possible workover.

AMENDMENT: Place 35-foot cement cap on Bridge Plug at 3350 feet, 2-sack cement cap on Bridge Plug at 3030 feet, and 35-foot cement cap on Bridge Plug at 7870 feet.

18. I hereby certify that the foregoing is true and correct

Instructions

General: This form is designed for submitting proposals to perform certain well operations, and reports of such operations when completed, as indicated, on Federal and Indian lands pursuant to applicable Federal law and regulations, and, if approved or accepted by any State, pursuant to applicable State law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either as shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 17: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones, or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between and above plugs; amount, size, method of parting of any casing, liner or tubing pulled and the depth to top of any left in the hole; method of closing top of well; and date well site conditioned for final inspection looking to approval of the abandonment.
