Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Westates-Federal No. 8 is dually completed in the McKee (7782'-94', 8024'-42') and Montoya (7070'-7120') pay zones. The McKee zone was temporarily abandoned in 1964 since it had reached its economic limit.

The proposed workover is as follows:

1. Abandon McKee zone by setting a CI bridge plug at approximately 7550' with 10' cement on top of plug.
2. Perforate additional porosity zones in Montoya formation with 1 hole per foot as follows: 7213', 7218', 7224', 7231', 7234', 7242', 7247', 7251', 7254', 7264', 7267', 7273', 7288'.
3. Acidize new perforations with 2000 gals.
4. Place well on pump as single completion in Montoya.

18. I hereby certify that the foregoing is true and correct
