**Re: Application to Dual Complete
New Mexico State "EN" No. 3
North Justis Pool
Lee County, New Mexico**

**Mr. A. L. Porter, Jr., Secretary-Director
New Mexico Oil Conservation Commission
Box 872
Santa Fe, New Mexico**

Humble Oil and Refining Company respectfully requests administrative approval to dual complete its New Mexico State "EN" No. 3, North Justis Pool, Lee County, New Mexico, located in Unit F, Section 2, T-25-S, R-37-E.

This is a proposed multiple completion (combination) whereby one string of 4-1/2-inch casing and one string of 2-7/8-inch casing will be run and cemented in a common well bore. The Ellenburger pay will be produced through the 4-1/2-inch string, which will be tubed with 2-3/8-inch tubing, and the Fusselman pay will be produced through the 2-7/8-inch string.

Two copies of this application are being forwarded to your Hobbs Office and one copy to each offset operator.

Yours truly,

HUMBLE OIL AND REFINING CO.

1. The first of these is the fact that the Commission has not yet received any information from the Government of the United States regarding the activities of the Committee for the Liberation of the People of the East (CLPE) in the United States. The Commission is therefore unable to determine whether the CLPE is a legitimate organization or a subversive group.

1. The first step in the process of identifying a problem is to define the problem. This involves identifying the symptoms of the problem and determining the scope of the problem. Once the problem has been defined, the next step is to identify the causes of the problem. This involves identifying the factors that are contributing to the problem and determining the underlying causes. Once the causes have been identified, the next step is to develop a plan of action. This involves identifying the steps that need to be taken to solve the problem and determining the resources that will be needed to implement the plan. Finally, the last step is to implement the plan and monitor the results. This involves putting the plan into action and tracking the progress of the solution. Once the problem has been solved, the final step is to evaluate the results and determine if the solution was effective. This involves comparing the results of the solution to the original problem and determining if the problem has been solved.
