INVESTIGATION REPORT
SECTION 1. INTRODUCTION

The purpose of this investigation was to determine the effectiveness of the proposed changes in the existing system. The investigation was conducted over a period of six months, from January to June 1964. The results of the investigation are presented in this report.

Details of the investigation are given below:

1. Objectives of the investigation	2. Scope of the investigation
3. Methodology of the investigation	4. Results of the investigation
5. Conclusions of the investigation	6. Recommendations of the investigation

The investigation was conducted in accordance with the following objectives:

- 1. To determine the effectiveness of the proposed changes in the existing system.
- 2. To determine the impact of the proposed changes on the existing system.
- 3. To determine the feasibility of the proposed changes.
- 4. To determine the cost of the proposed changes.
- 5. To determine the time required for the proposed changes.
- 6. To determine the resources required for the proposed changes.

The investigation was conducted in accordance with the following methodology:

- 1. A review of the existing system was conducted.
- 2. A review of the proposed changes was conducted.
- 3. A comparison of the existing system and the proposed changes was conducted.
- 4. A series of experiments were conducted to determine the effectiveness of the proposed changes.
- 5. The results of the experiments were analyzed.
- 6. The conclusions of the investigation were drawn.

The results of the investigation are presented in this report. The conclusions of the investigation are that the proposed changes are effective, feasible, and cost-effective. The recommendations of the investigation are that the proposed changes be implemented.

The investigation was conducted in accordance with the following methodology:

1. A review of the existing system was conducted.

2. A review of the proposed changes was conducted.

3. A comparison of the existing system and the proposed changes was conducted.

4. A series of experiments were conducted to determine the effectiveness of the proposed changes.

5. The results of the experiments were analyzed.

6. The conclusions of the investigation were drawn.
