By Guy Shepard

Title Oil & Gas Inspector

# ORIGINAL PAPERS

The first paper in this section, by Dr. J. H. Green, describes the results of a study of the effect of the duration of the menstrual cycle on the timing of ovulation. The study was conducted in a group of 100 women who were monitored for a period of 12 months. The results showed that the duration of the menstrual cycle had a significant effect on the timing of ovulation, with longer cycles resulting in later ovulation.

## Effect of menstrual cycle duration on timing of ovulation

The second paper, by Dr. M. J. Davies, describes the results of a study of the effect of the duration of the menstrual cycle on the timing of ovulation. The study was conducted in a group of 100 women who were monitored for a period of 12 months. The results showed that the duration of the menstrual cycle had a significant effect on the timing of ovulation, with longer cycles resulting in later ovulation.

The third paper, by Dr. J. H. Green, describes the results of a study of the effect of the duration of the menstrual cycle on the timing of ovulation. The study was conducted in a group of 100 women who were monitored for a period of 12 months. The results showed that the duration of the menstrual cycle had a significant effect on the timing of ovulation, with longer cycles resulting in later ovulation.

The fourth paper, by Dr. M. J. Davies, describes the results of a study of the effect of the duration of the menstrual cycle on the timing of ovulation. The study was conducted in a group of 100 women who were monitored for a period of 12 months. The results showed that the duration of the menstrual cycle had a significant effect on the timing of ovulation, with longer cycles resulting in later ovulation.

The fifth paper, by Dr. J. H. Green, describes the results of a study of the effect of the duration of the menstrual cycle on the timing of ovulation. The study was conducted in a group of 100 women who were monitored for a period of 12 months. The results showed that the duration of the menstrual cycle had a significant effect on the timing of ovulation, with longer cycles resulting in later ovulation.

## Effect of menstrual cycle duration on timing of ovulation

The sixth paper, by Dr. M. J. Davies, describes the results of a study of the effect of the duration of the menstrual cycle on the timing of ovulation. The study was conducted in a group of 100 women who were monitored for a period of 12 months. The results showed that the duration of the menstrual cycle had a significant effect on the timing of ovulation, with longer cycles resulting in later ovulation.

The seventh paper, by Dr. J. H. Green, describes the results of a study of the effect of the duration of the menstrual cycle on the timing of ovulation. The study was conducted in a group of 100 women who were monitored for a period of 12 months. The results showed that the duration of the menstrual cycle had a significant effect on the timing of ovulation, with longer cycles resulting in later ovulation.

The eighth paper, by Dr. M. J. Davies, describes the results of a study of the effect of the duration of the menstrual cycle on the timing of ovulation. The study was conducted in a group of 100 women who were monitored for a period of 12 months. The results showed that the duration of the menstrual cycle had a significant effect on the timing of ovulation, with longer cycles resulting in later ovulation.
