## FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

5 3/16" seamless casing cemented at 3290 with 150 sax. Total depth 3483'. Well ceased producing oil in 1941 and was designated as an input well for repressuring by Commission Order #388. Repressuring project was not successful as it was found that it was impossible to inject gas in well. Well has been inactive since 1942. Now propose to perforate casing 2970-3060' and convert to gas well. Will set cement plug in bottom, fill with gravel to 3100' and set cement plug in casing at 3060-3100'. Will let plug set 72 hours and perforate casing from 2970-3060' with glycerine shot.
