UNITED STATES DEPARTMENT OF THE INTERIOR
BUREAU OF LAND MANAGEMENT
WASHINGTON, D. C. 20250

RECORDS MANAGEMENT AND REPORTS ON WELLS

1. The purpose of this manual is to provide a guide for the collection, management, and reporting of well records. It is intended for use by personnel responsible for the management of well records in the Bureau of Land Management.

2. This manual is divided into two main sections: (a) Collection and Management of Well Records, and (b) Reporting of Well Records. Section (a) describes the procedures for the collection and management of well records, including the use of well logs, well logs, and well logs. Section (b) describes the procedures for the reporting of well records, including the use of well logs, well logs, and well logs.

3. The following are the major components of the well records system:

- (a) Well logs: These are the primary source of information about a well. They contain data on the location, depth, and other characteristics of the well.
- (b) Well logs: These are the primary source of information about a well. They contain data on the location, depth, and other characteristics of the well.
- (c) Well logs: These are the primary source of information about a well. They contain data on the location, depth, and other characteristics of the well.

The Division of Land Management

DETAILS OF WORK

4. The Division of Land Management is responsible for the collection, management, and reporting of well records. It is divided into two main sections: (a) Collection and Management of Well Records, and (b) Reporting of Well Records. Section (a) describes the procedures for the collection and management of well records, including the use of well logs, well logs, and well logs. Section (b) describes the procedures for the reporting of well records, including the use of well logs, well logs, and well logs.

5. The following are the major components of the well records system:

- (a) Well logs: These are the primary source of information about a well. They contain data on the location, depth, and other characteristics of the well.
- (b) Well logs: These are the primary source of information about a well. They contain data on the location, depth, and other characteristics of the well.
- (c) Well logs: These are the primary source of information about a well. They contain data on the location, depth, and other characteristics of the well.
