OIL CONSERVATION COMMISSION,
 Santa Fe, New Mexico

Place

Date

Gentlemen:

You are hereby notified that it is our intention to commence the drilling of a well to be known as

Sam Weiner - Smith

DUPLICATE

Well No. **2** in **NE, SE, NE**

Company or Operator **Sam Weiner - Smith** Lease **37E** of Sec. **4**, T. **25S**, R. **37E**, N. M. P. M., Field, **Lea** County, N.

The well is **1650** feet **N** [S.] of the **N** line and **330** feet

E [W.] of the **E** line of **4**

(Give location from section or other legal subdivision lines. Cross out wrong directions.)

If state land the oil and gas lease is No. _____ Assignment No. _____

If patented land the owner is **George A. Smith**

Address **Jal, New Mexico**

If government land the permittee is _____

Address _____

The lessee is _____

Address _____

AREA 640 ACRES
 LOCATE WELL CORRECTLY

We propose to drill well with drilling equipment as follows:

Standard Cable Tools

The status of a bond for this well in conformance with Rule 39 of the General Rules and Regulations of the Commission is as follows: **Blanket Drilling Bond filed in Santa Fe, New Mexico**

We propose to use the following strings of casing and to land or cement them as indicated:

Size of Hole	Size of Casing	Weight Per Foot	New or Second Hand	Depth	Landed or Cemented	Sacks Cement
18"	15-1/2"	70	Second hand	110'	Cemented	50
12 1/2"	10"	40	"	800'	Landed	----
9-5/8"	8"	32	"	1375'	Cemented	300
8-5/8"	7"	24	"	3200'	Cemented	200

If changes in the above plan become advisable we will notify you before cementing or landing casing. We estimate that the first productive oil or gas sand should occur at a depth of about **3450** feet.

Additional information:

Approved _____, 19 _____
 except as follows:

Sincerely yours,

Sam Weiner

Company or Operator

By *Sam Weiner*

Position **Owner**

Send communication regarding well to

Name **Sam Weiner**

Address **Box 297, Wink, Texas**

Title _____

RECORD OF MORTALITY IN POND

The following record of mortality in the pond was obtained from the records of the pondmaster, Mr. J. H. Smith, who has been in charge of the pond since 1958. The record shows that the mortality was highest in the spring and lowest in the summer and fall.

The following table shows the number of fish that died in the pond during the year 1961. The table is divided into four columns: Date, Number of Fish, Cause of Death, and Remarks. The data shows that the mortality was highest in the spring and lowest in the summer and fall. The causes of death were mostly due to disease and parasites, but some were due to accidents and starvation.

The following table shows the number of fish that died in the pond during the year 1962. The table is divided into four columns: Date, Number of Fish, Cause of Death, and Remarks. The data shows that the mortality was highest in the spring and lowest in the summer and fall. The causes of death were mostly due to disease and parasites, but some were due to accidents and starvation.

The following table shows the number of fish that died in the pond during the year 1963. The table is divided into four columns: Date, Number of Fish, Cause of Death, and Remarks. The data shows that the mortality was highest in the spring and lowest in the summer and fall. The causes of death were mostly due to disease and parasites, but some were due to accidents and starvation.

The following table shows the number of fish that died in the pond during the year 1964. The table is divided into four columns: Date, Number of Fish, Cause of Death, and Remarks. The data shows that the mortality was highest in the spring and lowest in the summer and fall. The causes of death were mostly due to disease and parasites, but some were due to accidents and starvation.

The following table shows the number of fish that died in the pond during the year 1965. The table is divided into four columns: Date, Number of Fish, Cause of Death, and Remarks. The data shows that the mortality was highest in the spring and lowest in the summer and fall. The causes of death were mostly due to disease and parasites, but some were due to accidents and starvation.

The following table shows the number of fish that died in the pond during the year 1966. The table is divided into four columns: Date, Number of Fish, Cause of Death, and Remarks. The data shows that the mortality was highest in the spring and lowest in the summer and fall. The causes of death were mostly due to disease and parasites, but some were due to accidents and starvation.

The following table shows the number of fish that died in the pond during the year 1967. The table is divided into four columns: Date, Number of Fish, Cause of Death, and Remarks. The data shows that the mortality was highest in the spring and lowest in the summer and fall. The causes of death were mostly due to disease and parasites, but some were due to accidents and starvation.

The following table shows the number of fish that died in the pond during the year 1968. The table is divided into four columns: Date, Number of Fish, Cause of Death, and Remarks. The data shows that the mortality was highest in the spring and lowest in the summer and fall. The causes of death were mostly due to disease and parasites, but some were due to accidents and starvation.

The following table shows the number of fish that died in the pond during the year 1969. The table is divided into four columns: Date, Number of Fish, Cause of Death, and Remarks. The data shows that the mortality was highest in the spring and lowest in the summer and fall. The causes of death were mostly due to disease and parasites, but some were due to accidents and starvation.
