Re: Form G-110 Wells #5

O
Gentlemen:

This letter is in reference to the R. Olsen's Wells Federal No. 5 well located in Section 5 T25R R37E, and of your letter of December 2, 1956, to Mr. Warren Mankin of the Oil Commission in Santa Fe.

P
Mr. R. Olsen sent us logs on this well in question, and in studying the logs we find that the top of the Seven Rivers is at 3210', and the top of the Queen is at 3550'. The perforations being from 3250' to 3280' definitely places this well in the Jalmat Pool

Y
Please file a new Form G-110 on the R. Olsen Wells Federal No. 5, showing a reclassification from Langlie-Mattix Pool to the Jalmat Pool.

Yours very truly,

OIL CONSERVATION COMMISSION

John W. Runyan
Geologist
