El Paso Natural Gas Co.
Box 1384
Jal, New Mex.

Attn: Mr. R. T. Wright

Gentlemen:

The El Paso Natural Gas Co. Wells No. 4-F in Section 5, T-25-S, R-37-E, Jalmat Gas Pool has, according to Forms C-115, been producing illegal gas since the well was recompleted in the Jalmat Gas Pool on June 1, 1956. This well does not have an MSP Order, nor according to the records of this office has one been applied for. Further, the records reflect that R. Olsen was operator until August 17, 1956, thereby sharing the responsibility of this illegal production.

You are directed to cease production from this well upon receipt of this letter. An allowable will be assigned this well upon completion of the required procedure.

Yours very truly,

OIL CONSERVATION COMMISSION

R. F. Montgomery
Proration Manager

R. Olsen
Drawer "Z", Jal, New Mex.

OIL CONSERVATION COMMISSION

NOBIS NEW YORK

1. The first step in the process of the investigation is the identification of the problem. This is done by the investigator, who is usually a member of the research team. The investigator must first identify the problem, then determine the scope of the problem, and then determine the objectives of the investigation.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific information required.
