The elevation of the derrick floor above sea level is _3242.5 G.L._ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill to the approximate depth of 3500', set 300' of 8 5/8" casing (surface) cemented with 250 sacks cement to set 24 hrs. Approximately 3500' of 5 1/2" casing to be set using 300 sacks neat cement, set at 1100' to set 48 hrs.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
