DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is our intention to drill this well to an approximate total depth of 3250 feet in the Yates - Seven Rivers formation.

We plan to use casing as follows:

8-5/8" 200 J-35 @ 1100' and cement with approximately 500 cu. ft. 15.500 J-35 @ Total Depth - cement volume to be determined by caliper.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
